

OZZI KLEEN

Water & Waste Water

Packaged Pump Stations

Ozzi Kleen Pump Stations are made from tough polyethylene and are weight for weight stronger than concrete. These small to medium sized pump stations (0 to 2.4 meter) are ideal for use in many applications where required to pump to your treatment plant, septic tank or holding tanks. Ozzi Kleen pump stations are unobtrusive, durable and reliable with minimal installation time and costs involved.

All Ozzi Kleen Pump Stations come with a welded Akatherm inlet to accept DWV PVC pipe in the size to suit your application as well as a 50mm Uniseal outlet.

Optional extras - non return valves, ball valves, pipework, guiderail kits, and poly valve enclosures to suit your application.

KEY BENEFITS

- Lightweight, easy to manoeuvre and install
- 200L to 5000L in a variety of shapes and sizes and colours
- Single piece design, no root intrusion
- Do not crack or corrode like steel and concrete
- 15 year warranty on all tanks
- Designed for below or above ground use
- Can be incorporated into multiple systems
- Easily modifiable to suit any specifications including Mine Spec
- Multiple pump configurations available
- Multiple controllers available to suit your application
- Installed extensively in both commercial and domestic applications
- Telemetry and strobe light alarm system available
- Can transfer liquids from zero fall ground level to 2 meter invert level

Efficiency, Reliability, Simplicity
